ARCHITECTURAL ENGINEERING SOLUTIONS

Architectural products encompass a broad range of materials and building elements including toilet partitions, ceiling systems, expansion joint covers and surfacing materials. Architects and designers use many of these materials in the construction of a building, while others help to put the finishing touch on custom elements like partitions and custom built furniture. Nipras strives to manufacture & provide the latest architectural designed products that can be used in workplaces, education and health care. These materials are an important part of the design of an interior because they are deeply integrated into the project.
