INTRODUCTION

NIPRAS METAL GROUP COMPANY Ltd. (NMGC)

- Established in the year 2010 with high quality Manufacturing & Trading expertise with 3 companies under the umbrella -

- 
- 1. NIPRAS METAL INDUSTRY COMPANY (NMIC)***
 - 2. NIPRAS METAL TRADING COMPANY (NMTC)***
 - 3. NIPRAS METAL CONTRACTING Est. (NMCE)***

We are a Saudi based company with our team in major cities across the kingdom with our headquarters in RIYADH providing the best & professional solutions in construction & architectural industry. Intuitive creativity, precise technical assistance and reputed interest in our client marked us as one of the leading Industries throughout the KINGDOM and other GCC countries.

Our success will be validated when the end users use the product and “their heart leaps for joy” and “they are deeply moved”. We will create a future without limits through valued manufacturing. We will be responsible for planning, development, and manufacturing and be considered as the only manufacturer of its kind. We have earned great respect as a manufacturer and trader by serving the best to our valued customers.

We have a plan to build the successful businesses for today's economy. We aim at manufacturing our products to not only have a beautiful appearance, but also that the customers perceive something of great intrinsic value when they touch it. We constantly strive to create future products that will stimulate the customer's senses to bring about joy and excitement each time the product is used.

ACCOUNTABILITY

We accept responsibility for our work products and services. Upholding the highest standards evaluating for measuring our results against stated performance for our work with relevance, credibility and timelessness

COMMUNICATION

We clarify expectations up front and communicate openly, honestly and accurately. We look for ways to improve our ways and for our work products by seeking giving and use both praise and constructive feedback.

TEAM WORK

Our success depends on working together and fostering an inclusive and mutually supportive environment. Our work-friendly for environment encourages collaboration, innovation, flexibility and figure the integration of resources

RESPECT

We promise diversity and equal opportunity throughout other organizations. We value and respect the wives of our clients

OUR VISION

To be a preferred partner for our valuable customers and consistently exceeding our customer's needs and expectations in quality, delivery, and cost through continuous improvement and enhancing customer satisfaction. We go all out to manufacture, deliver and supply superior steel and metal products to our clients utilizing sustainable procedures that meet the international standards.

OUR MISSION

NIPRAS strives to strengthen its manufacturing base in the steel industry to serve the kingdom and contributing to its vision through effective utilization of resources and materials with cutting edge technology edge and high productivity, consistent with modern management practices.

OBJECTIVES

- NIPRAS aims is to fabricate steel and metal work in the construction sector by the development of standards to turn raw metal into Architectural engineering solutions that can be used in construction.
- To supply the best solutions in construction industry in collaboration with our valued business partners throughout the KINGDOM.
- To assist clients, kingdom wide, by providing Architectural engineering solutions and expertise.
- To expand our business by offering products in finest quality, cost and standards.
- To provide our employees with the opportunity to develop their full potential within a safe and productive environment.
- To seek a competitive advantage by developing partnerships with clients, suppliers and subcontractors.

RESEARCH & DEVELOPMENT

R & D refers to two intertwined processes of research (to identify new knowledge and ideas) and development (turning the ideas into tangible products or processes). Our Research and development (R&D) department includes activities that we undertake to innovate and introduce new products and services.

NIPRAS R & D's mission is to Develop products that create value for customers and expand the use of NIPRAS products worldwide improve NIPRAS competitiveness by developing new industrial processes – and optimising existing ones – to reduce cost and improve quality contribute to sustainable development by reducing the environmental impact of products and processes continuously upgrade NIPRAS scientific knowledge and attract the technical talent in the young generation.

TECHNICAL TEAM

Lead with Engineers and other professionals at NIPRAS TECHNICAL DEPARTMENT, we access a vast array of advanced, highly sophisticated testing, modelling, failure analysis and other resources to develop the next generation of products, where the future is born.

Technical Division is entrusted with the work in respect of various subjects of technical nature via Research & Development, Energy & Environment Management, Standardization & Quality Control of products ETC. The work being dealt with by this division may be grouped under few categories namely,

- *Research & Development in Metal & Steel Fabrication*
- *Technical Regulations on the Products to promote quality*
- *Technical Inputs on the ongoing / future products ETC.*

SOCIAL RESPONSIBILITY

We "NIPRAS" have the ability to sense, understand and react to others emotions while comprehending on social networks. (Social awareness which encompasses the competency of empathy is the ability to read non-verbal cues for negative emotions, particularly anger and fear and to judge the trustworthiness of others. It is about understanding others feelings, not experiencing them (Garner, 2009).

NIPRAS accentuates on an individual's ability to identify, perceive and react to other's emotions while being a part of the social network circuitry. NIPRAS understands the ability to and compassionate to the feelings, views, opinions, and challenges of other people. Social-awareness cannot only be equated with understanding people's needs but as well as caring for them (Coleman, 2006).

CIVIL SOCIETY

According to the Saudi Youth in Numbers report, 37% of the Saudi population is under 25. This entails that the youth will play a more significant role in undertaking the paths set by Vision 2030 and inheriting the future it's attempting to build. NIPRAS gives our platform to the young for developing their sense of civic responsibility, involvement, and interconnectedness. Opportunities to equip the upcoming generation with the necessary skills and motivation to become active participants in their communities.

CUSTOMERS

A business cannot work without a consumer. The survival and growth of business depends on consumer satisfaction, service and support. "NIPRAS" winning the confidence of our customers made it possible by following a positive attitude towards customers and fulfilling our social responsibilities by providing them

- A. Quality*
- B. Fair Prices*
- C. Honest Advertising*
- D. Safety*
- E. After Sales Services*
- F. Regular Supply*
- G. Research & Development for their requirements*

EMPLOYEES

At NIPRAS we empower our employees to leverage the corporate resources at their disposal to do well. Being a socially responsible company can bolster a company's image and build its brand.

ENVIRONMENT

NIPRAS understands the nature of the relationship between corporate adoption of the concept of social responsibility [availability of environmental awareness, clear vision of the impact of societal responsibility on financial performance, managers informing employees of the latest developments in societal responsibility programs, manager's response to their corporate social responsibility (CSR) proposals] in the form of an annual report that supports the success of the company's objectives, the company's management encourages employees to participate collectively in societal responsibility programs and to protect the environment from pollution in the industry.

EMPLOYEES

Being a committed employee

- Develop talents & encourage leadership and collaborative management.
- Promote diversity & global thinking

CUSTOMERS

Being an outstanding partner for our clients

- Provide innovative & sustainable high-quality solutions that meet our customers requirements.
- Build long-term trusting relationships

CIVIL SOCIETY

Serve civil society

- Boost innovative and establish partnership with academic and scientific communities Act
- ethically & responsibility

ENVIRONMENT

Being an environmentally friendly player

- Develop solutions that will help reduce environment footprint of manufacturers and comply with regulatory requirements.
- Limit the environment impact of our global offices

HEALTH & SAFETY

"NIPRAS" as a manufacturing Company for Metal & Steel Products has a large number of hazards because of the strong internal as well as external forward and backward linkages in terms of material flows. Employees are to work in a hazardous environment because of complicated equipment layouts, high temperatures, heavy equipment's, moving machinery, hazardous processes, heavy lifting and movements of materials in the work environment etc. Further, several operations involve working at heights or in confined spaces. In short, working involves both very high volume as well as the complexity of operations which results in employees getting exposed to a high level of health and safety risks. The health, safety, and protection of our employees, equipment, and the environment are perfectly calculated and implied as crucial since it affects both economic and social factors. On the other hand, a healthy and safe workplace contributes towards plants competitiveness as well as profit growth

RANGE OF PRODUCTS

NIPRAS has a wide range of value engineered products serving our customers in a professional and timely manner. We look forward to expand and enhance our strengths to be the most desired company all along the KINGDOM & GCC for manufacturing in Metal & Steel Industry as well as in contribution with our valued business partners in trading industry.

MANUFACTURING DIVISION

NIPRAS METAL INDUSTRY Co. (NMIC) for metal industries is primarily engaged in manufacturing and supervision of metal and steel construction products.

NMIC products reflects its commitment to high standards of quality, consistency and accurate measures. In this fast growing manufacturing industry, **NMIC** has always maintained its standards locally and globally.

Our vision is to stand out and be unique in architectural and industrial products with high durability, strength, quality, safety and efficiency. **NMIC** enables you to efficiently fix, protect and install your products. All products are fabricated and manufactured using high quality material that meets the toughest industry standards.

Our mission is to develop effective solutions for all Architectural and industrial needs.

CORE STRENGTH PRODUCTS

CABLE MANAGEMENT SYSTEM

There are a wide variety of containment systems available to organize and store cables within an installation. They tend not to be used exclusively for a particular type of wiring system, and the containment system chosen is often as much decided by the budget and practical considerations of the building it is being installed in as the cabling type itself.

Cable Tray

Cable Ladder

Cable Trunk

Basket Tray

ROOF ACCESS HATCH

NMG provides access to your roof with safe and secure Roof Access Hatch. Roof hatch can be used for personal access or equipment access. With respect to the industry standards NMG has the capability to produce roof hatch in custom size and standard sizes.

Our roof hatch differs from other roof hatch with more durability, strength, and perfect quality.

HANDRAILS

A hollow metal bar extending from one end to another fixed on a post or wall for people to hold for support.

It is a part of a staircase people use for going up or coming down.

Handrails are made in stainless steel and galvanized steel pipes or tubes. NMG has the potential to select the best material which suits the toughest industrial standards.

Common Parts, Accessories & Basic Standard of a Handrail

A Handrail consists of end post, intermediate post, end caps, baseplates, baseplate covers, joiners, and rail supports. By combining these parts with suitable material, we can produce beautiful designs.

Handrail designs are

GARBAGE & LINEN CHUTE SYSTEM

Chutes from NMG are very convenient, simple, and low-cost method of controlling and disposing of refuse and linen.

Chutes meet the most stringent requirements of environmental health and safety. Chutes are used as original equipment in new buildings, such as: Hotels, Hospitals, High Rises and Residential Towers.

NMG refuse chutes can be fixed externally to most types of building, particularly useful when a refuse chute location. External refuse chutes can be single or double skinned. Please contact our technical department must be provided after the building has been finished or where it is not possible to replace in the same for further advice.

NMG provides a comprehensive range of refuse chutes, both in size and material choice.

The choice of materials to be used are covered thoroughly elsewhere, the choice of refuse chute diameter is shown on this page.

However, we strongly recommend the use of 600 mm diameter chutes, as in practical terms this diameter is the least likely to cause any long-term problems.

LADDERS

Ladder is an essential equipment made from steel tubes and pipes, used in almost every field. Ladder can be used for construction, residential use, heavy duty works involving certain heights etc.,

Ladders can be fixed to a wall or rail, cage ladder, cat ladder, extendable ladder, or channed ladders and some of the common types of ladders used

Common Parts, Accessories & Basic Standard of a Ladder

NMG produces some of the finest ladders in the market which suits all your needs.

Most common parts of a ladder can be a Rail, Rung, Safety foot and bracket to fix on the wall. Ladder rung can be made of tube of pipe. Ladder brackets are used to secure the ladder on the roof or wall.

LOCKERS

Lockers are small lockable cupboard or compartment, typically as one of a number placed together for public use, for example. In Schools, Gyms, Railways etc.,

Lockers are small lockable cupboard or compartment, typically as one of a number placed together for public use, for example. In Schools, Gyms, Railways etc.,

STEEL BOARDS

Safety steel bollards can refer to a variety of steel uprights and metal products. They often provide protection from vehicles in addition to segregating walkways and prohibiting vehicle access. They are weather-resistant, which makes them useful for long-term outdoor use.

Typical Details of A Steel Boards

Steel Bollards can be inserted into the ground with minimum 100mm to 150mm or it can be bolted using baseplates according to the bollard size.

NMG provides steel bollards with best material finish to suit the weather conditions and structural rigidity. With extended horizontal pipe with similar size of bollard, NMG possess the ability to manufacture wall guards as well.

GATES AND FENCES

NMG possess the ability to produce custom size GATES and FENCES with steel tubes and pipes

GRATINGS

Steel Gratings is an open grid assembly of metal bars, in which the bearing bars, running in one direction, are spaced by rigid attachment to cross bars running perpendicular to them.

Gratings can be fabricated in steel, cast iron, stainless steel, and galvanized steel depending upon the requirement where it is applied. Specific Steel grating can be used for many applications, such as walkways, ladder steps, drains, and ventilations.

There are few important aspects to consider at the time of fabrication.

1. Bearing bar size
2. Cross bar size
3. Twisted rod size
4. Bearing bar spacing
5. Cross bar spacing

TRADING DIVISION

NIPRAS METAL TRADING Co. (NMTC) Since its formation in the year 2010, has been providing continuous constructional and industrial solutions to huge projects with impressive customer satisfaction. **NMTC** trades in building materials , metal and steel products for complex projects and is capable to fabricate and produce a wide range of metal products in-house.

NIPRAS METAL GROUP (NMG) possesses the capacity and potential to provide the safest and most reliable products to its customers. The key to our success depends on accountability, teamwork, and communication. We facilitate trading in construction projects involving parks, schools, high-rise commercial, and residential buildings, malls, hospitals, and many more. **NMTC** promotes diversity and equal opportunity throughout other organizations. We value and respect the views of our competition.

CONTRACTING DIVISION

NIPRAS Metal Contracting Est (NMCE) is one of the leading qualified contractors in K.S.A, Directed by highly qualified, experienced and technical team. The company achieved its position in the core of contracting business in the Kingdom of Saudi Arabia over a short span of time through highly skilled team of professional management.

We are quality / time conscious contractor and have a proven track record of keeping the time cost factor as our main consideration.

We believe in working closely with our clients to make sure every detail of the project is taken care of. The overall objective at NMCE is to ensure a consistent high level of service.

Our scope covers Engineering, Documentation, Submitting Approval, Shop drawings, Coordinating drawings, Commissioning, Start-Up, we make Project Time Schedules and Complying Consultant Specifications, International Standards & Codes, Safety & Quality Plans.

NIPRAS for General Contracting CO. has specialized Departments and each department is divided to cover the different types and styles of property, buildings, and construction. The divisions based on distinctive features are as follows:

- [Residential & Housing](#)
- [Commercial & Businesses](#)
- [Administrative & Organizations](#)
- [Governmental & Public](#)
- [Industrial](#)
